

## WW1 Commemoration Activity from Belgium

The following information has been received from ON7ME with regards to WW1 Commemoration activity...

As you all know there will be a ham radio station active on Sunday May 27th, commemoration day WW1 in Oudenaarde nearby the Ohio Bridge.

The station will be active from about 08.00 h UTC until 16.00 h UTC.

Callsign " ON40B / P ". (UBA radioclub Oudenaarde.)

Frequencies are: (+/- QRM)

According the IARU Region 1 bandplanning, (Especially to stay out of the contests bandsegments.)

SSB :	CW :
3675 Kc	3575 Kc
7125 Kc	7035 Kc
14325 Kc	14065 Kc
21225 Kc	21050 Kc

Depending on propagation conditions (low solar flux activity at the moment) we will swap back and forth through all these frequencies.

Due to lack of space and time we have chosen for a simple antenna system. An 80 m inverted vee dipole with feedpoint at 9 meter.

To allow multiband operation it is fed with a 450 ohm ladder line through a PALSTAR BT1500A balanced tuner.

The rig is a vintage Collins S-line :

- 516F 2 Power supply unit
- 75S 3 Receiver
- 32S 3 Transmitter
- 312B 4 Control console
- 30L 1 Power amplifier (abt. 600 W)

I hope we will be able to make some nice QSO's

If you want some more info don't hesitate.
