Future and Current Events: (Full details on our website)

Special Event and DX Stations. (All with Affiliated Numbers if needed)

Here is the information covering the Pacific trip by Rick AI5P 4063.

VK9APX (Lord Howe Island) July 31-Aug10

AI5P/VK4 (Australia) Aug 11-17

Rick continues to do his best and many spots have been received for FO/AI5P. Sadly, I am unaware of any RSARS members finding him.

NI6BB F491 is currently active both FT8 and CW on 30m, 17m and 20m but sadly not yet in my log. I am aware that Fred VE9UN is looking for members on FT8 and Winston VE3YFB with SSB.

I was extremely pleased to make contact with Michael W2IY for a RSARS point late July and to thank him gave him an IOTA point on his island NA-055 so slowly, slowly I am getting there.

So, conditions are not totally lost – get looking and listening.

N2DAN Key

For the next 12 months we have the key being held by Alan G4BXQ so it would be nice if we do our best to give Alan our support. I will certainly be there as I need the points ☺ Yes I had the pleasure of catching him first day – thanks for the new one Alan.
